Address: 48 Liberty Ave, Belleville NJ

Summary

Experienced Full Stack Developer with a strong background in developing scalable, high-performance web applications. Skilled in both frontend and backend technologies, with expertise in JavaScript frameworks, RESTful APIs, and cloud services. Known for problem-solving, team collaboration, and a dedication to clean, efficient code.

Work Experience

CUNY Baruch College

Software Developer

2018 - PRESENT

- Led the development of a Study Abroad application using .NET Web API, Microsoft SQL Server, and React for the frontend, deployed on a Windows Server environment.
- Designed and implemented RESTful .NET APIs to support the React frontend, enabling secure, efficient data exchange and improved application performance.
- Migrated legacy data from Oracle to Microsoft SQL Server, ensuring data integrity, performance optimization, and minimal downtime.
- Integrated third-party data warehouse systems by extracting, transforming, and loading (ETL) data into SQL Server using SSIS.
- Designed the application's user interface and experience with a student-focused approach, creating an intuitive and visually engaging platform to increase student adoption.
- Collaborated closely with the Study Abroad department to analyze workflows and develop tailored solutions that reduced application processing bottlenecks and turnaround time.
- Implemented features that increased student engagement, automated manual processes, and improved departmental efficiency throughout the study abroad application lifecycle.
- Applied best practices for API security, validation, and error handling to ensure reliable and maintainable backend services.
- Engineered an application using PHP and Oracle SQL, facilitating efficient creation and printing of student transcripts, reducing processing time by 40%.
- Participated in hiring committees, conducting interviews to identify top candidates.
- Designed and implemented WordPress plugins, themes, and dashboard to meet the goals of the different departments, editors and end-users resulting in a 35% increase in website engagement.
- Ensured website accessibility compliance with WCAG 2.1 Level AA and ADA 508 standards, improving user experience for individuals with disabilities.

BaysideMedia LLC

Senior Web Developer

2016 - 2018

- Conducted regular meetings with both in-house and overseas team members to ensure effective coordination of project milestones and deadlines, fostering collaboration and synergy among team members.
- Engaged directly with clients to understand their project requirements and expectations, providing tailored solutions and delivering on client needs.
- Implemented comprehensive training sessions for a team on WordPress installations, utilizing MySQL, phpMyAdmin, WP CLI, and server environment setups, empowering team members to efficiently manage WordPress projects.
- Collaborated closely with a diverse team of 10 individuals, including Art Directors, Designers, Coders, and Interns, on a variety of projects, leveraging collective expertise to achieve project objectives.

- Installed and configured cPanel on Linux Ubuntu servers, enhancing server management capabilities and facilitating streamlined project workflows.
- Integrated contemporary front-end technologies such as HTML5, CSS3, JavaScript frameworks (such as React or Vue.js), and responsive design principles to create dynamic and visually appealing user interfaces.
- Implemented the MVC (Model-View-Controller) development model in all coding projects, enhancing code organization and maintainability.

Oneshot Marketing Inc

Junior Web Developer

2014 - 2016

- Created landing pages for products and services using PHP, JavaScript, and HTML with the goal of increasing conversion rates.
- Customized WordPress themes and plugins to meet project-specific needs while actively working on reducing development time.
- Enhanced website performance through code optimization and image compression, leading to a 30% decrease in page load times.
- Ensured cross-browser compatibility and responsiveness across devices through thorough testing and debugging, resulting in a 20% decrease in bounce rates.
- Integrated third-party APIs, such as payment gateways and CRM systems, increasing website functionality and user engagement.
- Provided ongoing website maintenance and troubleshooting support post-launch, resulting in a decrease in client-reported issues.
- Developed e-commerce sites in WordPress, Squarespace, and Shopify, leading to an increase in online sales for clients.

Hwang Gallery

Web Developer

2014- 2014

- Developed a dynamic and visually engaging Art Gallery website on the WordPress platform, leveraging Custom Post Types (CPT) and Advanced Custom Fields (ACF) to showcase artwork collections with finesse.
- Crafted the website's codebase using PHP for back-end functionality, HTML for structure, and SCSS for styling, ensuring a seamless and responsive user experience across devices.
- Engineered a bespoke WordPress plugin featuring a sophisticated bidding system tailored specifically for auctioning artwork, enhancing the website's functionality and facilitating seamless transactions.
- Designed and executed captivating email newsletters utilizing HTML and CSS, fostering engagement with subscribers and promoting gallery events and exhibitions effectively.
- Produced and refined promotional artwork for gallery exhibitions using Adobe Photoshop, showcasing artworks and events with visually compelling graphics that captured audience attention.
- Leveraged Adobe Suite programs to create custom images, icons, and vector graphics for the website, ensuring a cohesive and visually appealing Online presence.

Heavengroup Inc

Web Developer

2011 - 2013

- Collaborated with the Art Director to create visually stunning luxury websites on WordPress, resulting in a 30% increase in client satisfaction ratings.
- Led the development of custom landing pages for Beauty Salons nationwide, driving the sale of vouchers to thousands of customers, resulting in a 25% increase in sales revenue.
- Managed projects efficiently using Salesforce, ensuring seamless communication and coordination with stakeholders,.
- Utilized Dreamweaver to craft dynamic and responsive websites, ensuring optimal user experience across devices, resulting in a 15% increase in website traffic.
- Designed captivating advertisements with Photoshop, increasing brand visibility and customer engagement.
- Developed interactive ads with HTML and CSS, boosting consumer engagement and facilitating product purchases, resulting in a 25% increase in conversion rates.
- Contributed to an E-commerce platform development, creating a robust and user-friendly online shopping experience, leading to an increase in customer retention.

Technologies and Languages

Additional Skills: Software design principles, data structures, algorithm analysis, and documentation

Backend: NodeJS, Next.js Docker, RESTful APIs, GraphQL

Frontend: ReactJS, Gatsby.js, Redux, Redux Sagas, HTML5, CSS3

Databases: MySQL, MariaDB, Oracle Database, mongoDB

Languages: JavaScript, SQL, PHP, C#, Batch

Education

MASTERS DEGREE - Computer Science

NYIT	
New York, NY	2015

BACHELOR DEGREE - Graphic Arts Management

CUNY - City College of Technology	
Brooklyn, NY	2011
